PROFESSIONAL SUMMARY

Cloud/DevOps Engineer with hands-on experience deploying and managing infrastructure on Microsoft Azure. Skilled in Linux server administration, CI/CD pipeline automation using GitHub Actions and Azure DevOps, containerisation with Docker and Kubernetes, and Infrastructure as Code with Terraform. Proven ability to deliver secure, production-ready cloud environments through end-to-end project ownership.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure (AKS, ACR, VM, Networking, Cost Management, Monitor)

Infrastructure as Code: Terraform · Bash Scripting

CI/CD Pipelines: GitHub Actions · Azure DevOps Pipelines

Containers & Orchestration: Docker · Docker Compose · Kubernetes (AKS)

Monitoring & Alerting: Azure Monitor · Telegram-based alerting · Prometheus

Web Servers & Networking: Nginx · DNS · SSL/TLS · Load Balancing · TCP/IP

Operating Systems: Linux (Ubuntu) · macOS

Version Control: Git · GitHub

PROJECTS

Kubernetes Infrastructure Provisioning with Terraform

github.com/ochubavictor/terraform-aks-azure

Terraform · Azure AKS · Azure ACR · kubectl · Azure CLI

- Provisioned Azure Resource Group, Container Registry, and AKS cluster entirely using Terraform IaC — no manual portal interaction.
- Deployed a containerised Nginx application on Kubernetes exposed via a public LoadBalancer service.
- Managed full infrastructure lifecycle — provision, deploy, and destroy — from a single version-controlled codebase.
- Outcome: Production-grade IaC setup demonstrating repeatable, automated cloud infrastructure delivery.

Azure DevOps CI/CD Pipeline — Docker to AKS

github.com/ochubavictor/terraform-aks-azure

Azure DevOps Pipelines · Docker · Azure ACR · Azure AKS · YAML

- Built a multi-stage Azure DevOps pipeline to build a Docker image, push to Azure Container Registry, and deploy to AKS.
- Configured Service Connections for secure integration between Azure DevOps, ACR, and AKS.
- Outcome: Fully automated application delivery pipeline from code push to live Kubernetes deployment.

Full Stack Deployment — Docker, HTTPS & CI/CD

github.com/ochubavictor/azure-cicd-website

Docker · Nginx · GitHub Actions · Let's Encrypt · Certbot · Azure VM

- Deployed a containerised full-stack application on Azure VM with Nginx as a reverse proxy.
- Secured the application with HTTPS using Let's Encrypt SSL certificates via Certbot.
- Automated deployment pipeline using GitHub Actions — push to main triggers zero-intervention deploy.
- Outcome: Production-ready, HTTPS-secured application with fully automated CI/CD delivery.

Real-Time CPU Monitoring & Telegram Alerting System

github.com/ochubavictor

Azure Monitor · Bash · Cron · Telegram Bot API · Linux

- Built a real-time infrastructure monitoring system that tracks CPU usage on a Linux server.
- Wrote a Bash script to poll CPU metrics and trigger instant Telegram notifications when thresholds are exceeded.
- Scheduled automated monitoring using cron jobs for continuous, zero-intervention oversight.
- Outcome: Lightweight, production-style alerting system with real-time server health visibility.

Azure Cloud Cost Optimization Audit

github.com/ochubavictor/azure-cost-optimization

Azure Cost Management · Azure Advisor · Azure Monitor

- Audited Azure infrastructure to identify underutilised and zombie resources incurring unnecessary costs.
- Identified potential 60–80% cost reduction through VM right-sizing and removal of orphaned resources.
- Outcome: Structured cost reduction recommendations using Azure Cost Management and Azure Advisor.

Containerised Web Application Deployment with Docker Compose

github.com/ochubavictor/docker-compose-nginx-deployment

Docker · Docker Compose · Nginx · Azure VM · Ubuntu Linux

- Deployed a containerised web application on Azure VM using Docker Compose to orchestrate app and Nginx containers.

- Configured Nginx as a reverse proxy to handle routing and serve the application over the internet.
- Outcome: Fully containerised, internet-accessible web application running on cloud infrastructure.

EDUCATION

Bachelor of Science — Computer Science

Graduated 2023

Enugu State University of Science and Technology (ESUT), Nigeria
